# HEAVY DUTY RAIL

Dimensions: 204" / 168" / 144"

Cross-section dimensions: [1.61in] 41.02mm, [0.90in] 22.88mm, [38.0 mm], [3.15in] 80.0mm, [3.0mm], [0.39in] 10mm, [0.20in] 5mm

## HEAVY DUTY STRENGTH

Dual Rack Heavy Duty Rail is meticulously tailored for solar PV arrays across residential, commercial, and utility projects. Crafted with precision, Dual Rack anodized Heavy Duty Rails are the epitome of strength and durability, rigorously tested to confidently span up to twelve feet. Adding to the efficiency, pre-stamped engineering letters are available for PV-friendly states, facilitating a seamless permit acquisition process. Installers across the industry favor Dual Rack Heavy Duty Rails for their unwavering strength, reliability, and time-saving attributes. As the market's best-priced solution, Dual Rack Heavy Duty Rails redefine excellence in solar racking, providing robust support for projects of every scale.

## ADVANTAGES AND HIGHLIGHTS

- Advanced Dual Rack Design
- PE Certified in Multiple States
- Installation Simplicity
- Time and Cost Savings
- Efficient Design
- Versatile Installation
- User Friendly
- Multiple Size Options and Aesthetics
- 20-year Limited Warranty
- Conforms to UL STD 2703
- ETL Certified
- Class A Fire Rated

A. The table above ONLY includes Dual Rack rail capacity. It does not include roof attachment of roof capacity check.
B. Structural risk category per ASCE/SEI 7-16.   C. Wind exposure: B, C, D. Roof wind pressure region: Zone 1, Zone 2 & Zone 3.
D. Maximum mean roof height is 45 ft.   E. Seismic design category: A through E.   F. Roof pitch is between 0 degree and 55 degree.
G. Maximum solar panel weight is 50 lbs.   H. Height of solar panel is between 2" and 10" to roof.
*See Exposure C and D, zone 1 & 2 & 3 span table calculation details in Installation Manual/P.E. certification.

# INSTALLATION GUIDE

*For detailed instructions please refer to the Dual Rack installation guide*
Dual Rack provides robust, long-life photovoltaic (PV) module mounting system solutions for both roof mount and ground mount PV projects. The DR Heavy Duty rail is one of the strongest mounting rails in the market and the most competitively priced. Pre-stamped structural certification is available in most states. Installation is simple and fast, which ensures lower installation costs. Dual Rack allows modules to be mounted in both landscape and portrait orientations.
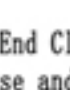

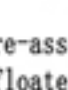

## ROOF MOUNT SOLUTION

Designed for seamless integration into residential and commercial rooftops, our solar roof mount combines aesthetic appeal with high-performance functionality. Experience the power of solar energy without compromising the architectural integrity of your structure. Dual Rack's Solar Roof Mount is the pinnacle of efficiency, bringing sustainable energy solutions to new heights.

## GROUND MOUNT SOLUTION

Engineered for durability and ease of installation, our ground mount solution is the ideal choice for commercial and utility-scale solar projects. With versatility in mind, Dual Rack's Ground Mount provides a solid foundation for harnessing solar energy on a grand scale.
